DETAILED ACTION

Summary

On March 27, 2006, an Office Action was sent to the Applicant rejecting claims 1-4. On June 26, 2006, the Applicant responded with arguments.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Thomas (6,317,745).

Thomas discloses a method and corresponding system for bill presentment and payment, as set forth in the previous Office Action. Thomas further discloses a batch mode processing (col.5, lines 55-63 and col.20, lines 13-30) and providing a file distribution agent for appending to the mainframe application files a HTTP header (col.16, lines 50-67).

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
